Subject: Verified dowsing story

Thanks Inez. Arvid, please put a paper copy of this result in our Verified Dowsing Story folder. Thanks.

Inez, could you please send Arvid how you dowsed this and what you told Mr. Dewey. Were you on site, did you map dowse, etc.

Hello!

I don't think I ever told you the final results of the accuracy of your analysis of where the gas leak was at Cave Springs. After we located all of the leaks, there were six separate pin holes in the pipe which were all caused by rocks rubbing against it, it turns out that you were about one foot away from the first hole. The spread you indicated completely covered the breadth of all of the holes! Most amazing! I would love to offer testament to anyone who needs it about what you did for me! Thank you very much.

Sincerely, Louie Dewey

Arvid,

On July 17, 2008, I received an e-mail from sequoia6earthlink.net. This is the contents of the e-mail:

Hi Ms Lindsey, (she spelled my name Lindse)

I found your e-mail address on the American Society of Dowers website. I have a question. I hope you can help with.

A friend of mine owns an older motel near the CA/OR (California/Oregon) border. It is in Dunsmuir, CA 96025)

Today he learned he has lost over 1,000 gallons of propane due to an underground leak

The propane lines run to 16 "rustic" cabins which were built in the 1930's. Propane fuel runs the hot water heaters, cooking stoves and heaters (when colder weather appears).

Question: Is there a possibility that a Dowser could dowse for the propane leak?

The propane company told my friend he needs to dig up all of his propane lines, which would be a major undertaking.

Thank you for whatever assistance you can provide.

**Sequoia
mail to: sequoia6@earthlink.net**

I followed up on this and told Louie Dewey that I had never dowsed for propane gas leaks but I would give it a try. I asked him to make a hand drawing of the property with his name address and telephone number on it and fax it to me.

He faxed a very detailed hand drawing of all of the cabins, the grocery store, swimming pool, pine trees, etc. I dowsed for the leaks and faxed it back to him.

He called someone to come out who has equipment for detecting gas leaks. They discovered that my dowsing was very accurate.

I've received two e-mails regarding my dowsing expertise on this matter.

I did not ask for a fee because I wasn't experienced in this type of thing and I wasn't sure how it would turn out but I told him that I thought it would be the same principle as other types of dowsing that I have done.

Rev. Inez Lindsey
